Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

This office action is in response to amendments filed September 14 and September 21, 2006. Applicant amended claims 1-3 and 10-12. Claims 1-12 are still pending.

Claim Rejections - 35 USC § 103

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stiles et al. (US 6,842,737) in view of Langseth et al. (US 6,662,195).

Regarding claims 1-3, 10-12, Stiles teaches automatically broadcasting to an information terminal for a given person pre-registered advertising information or reference information in connection with dates and times and/or places appropriate to the an itinerary (see abstract, col. 1 line 27 to col. 2 line 22, col. 3 lines 25-39, col. 7 line 29 to col. 8 line 53). Stiles teaches providing travel-plan schedules to third parties and accepting from the third part relevant information and broadcasting at predetermined timings the relevant information (see col. 7 line 10 to col. 8 line 53, col. 9 lines 30 to col. 10 line 25 and fig 18). Stiles teaches broadcasting pre-registered advertising information or reference information to a communication device according progress of an initial travel schedule or according to an updated travel schedule (see col. 16 lines 1-67, col. 7 lines 39-67). *Stiles teaches the travel intelligence report (TIR) linked to a travel agency web site and being presented to a traveler while purchasing an airline ticket.* Stiles teaches (see abstract) “(t)he associated system performs these functions, among others, to **provide information for a traveler planning a trip to a particular destination or destinations**”, i.e., providing information according to the time or place of the first destination

Art Unit: 3622

and the time and place of the second destination, which is the progress of the travel schedule (same as applicant's invention). Stiles does not explicitly teach travel progress determined from a travel schedule which is updated using travel progress information which includes at least one of travel ticket usage information, replacement ticket information and coupon usage. Langseth teaches personal intelligence network that actively delivers highly personalized and timely information to individuals (see col. 4 lines 3-16). Langseth teaches services provided in a travel channel such as personalized travel services, reservation reminder, ticket status, ticket purchase alert, flight cancellation alert, reservation cancellation alert (see col. 10 lines 47-67). It would have been obvious to one of ordinary skill in the art at the time of the invention to include Langseth's ticket information such as the status of the ticket, flight cancellation or reservation cancellation in Stiles's travel information. Stiles referring back to the ticket information would indicate whether traveler missed his flight or not. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to refer to the traveler's itinerary as in Langseth to check current traveler's status before broadcast relevant information.

Regarding claims 4-9, Stiles teaches predetermined personal information stored correlating with the communication addresses wherein the addresses are changed according to travel-plan schedule wherein the third part is billed according to broadcast count, etc (see col. 2 lines 4-22, col. 8 line 14 to col. 9 line 28, col. 9 line 37 to col. 10 line 65).

Response to Arguments

Applicant's arguments with respect to claims 1-12 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3622

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

McNicole et al. (US 6,615,179) teaches distributing current and real-time data to consumers and travelers directly to the location where the consumers and travelers are likely to require the data.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

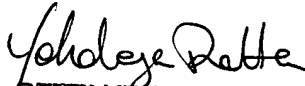

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
